OUR ENVIRONMENTAL POLICY

As ONE AGRO, we consider minimizing the environmental impacts arising from our activities, supporting the protection of natural resources, and leaving a livable environment for future generations through a sustainable production approach as our fundamental responsibility.

At our company, we commit to:

- Evaluating the environmental aspects arising from our activities from a life cycle perspective, reducing environmental impacts, and preventing pollution,
- Fully complying with applicable legal requirements, other compliance obligations, and voluntary commitments related to the environment,
- Promoting the efficient use of energy, water, and natural resources, reducing resource consumption, and contributing to the fight against climate change,
- Reducing waste generation at its source and adopting a circular economy approach by supporting reuse, recycling, and recovery practices,
- Preventing environmental pollution by ensuring that emissions, wastewater, noise, and other environmental impacts are controlled,
- Supporting clean production technologies and environmentally friendly practices by considering environmental performance in new investments, processes, and product development activities,
- Regularly monitoring environmental objectives and targets, measuring our performance, and continuously improving the effectiveness of our environmental management system,
- Supporting training, communication, and awareness activities to increase the environmental awareness of our employees, suppliers, and other relevant parties,
- Effectively managing environmental risks by being prepared for emergencies and minimizing the impacts of potential environmental incidents,
- Fulfilling our environmental responsibilities in line with sustainable development principles and creating value for our stakeholders and society.
